Notes: Lot 1 is a CAB qualified son of the widely used Tehama Tahoe and one of HT's up and coming donor prospects, HT Lass 9094, who is also CAB qualified and has three calves with WR of 107 and YR of 106. Phenotypically it is hard to find a bull put together better. He is long and deep from shoulder to his hindquarter. His back is straight and wide. His shoulder is structurally correct as is his rear end. He is very well-muscled and travels well. His feet and legs are excellent and he is very docile. His \$M and \$W EPDs are at the 2% and 1% levels and he has 20% \$G and \$B and 10% \$C EPDs.
